Building a Legacy of Innovation

September 15, 2011

MAAS Companies, Inc Announces New Corporate Divisions

MAAS announced an organizational restructure to achieve greater client connectivity, service and product excellence of its expanding operations. The new organizational structure will allow the Company to focus its resources towards growth in its emerging and developed markets in higher education and improve efficiencies throughout the company.

MAAS has reorganized its Company into two Divisions—*EISPRO* for building and program management, construction and development services; and the *M Group* for consulting, operational, IT, finance and planning services.

"Our new organizational structure marks a major milestone in 'Building a Legacy of Innovation' to continue the history of success at MAAS as a premier provider of innovative, value creating planning, management and consulting for higher education and other markets. It's a stronger, more competitive organization that collaboratively relies on two new corporate divisions to benefit clients and our shareholders," said Dr. Ron Kraft.

As part of the restructure, MAAS has centralized many of its corporate leadership functions, including finance, information technology (IT), legal, human resources, sales and branding at its Corporate Office in Irvine, CA. By centralizing these functions, the Company will reduce unnecessary costs it incurred in the past, leverage its talent through an open and transparent leadership structure, and accelerate the growth of its new Divisions.
